## Introduction

Welcome to *NBA Live*, year two! In its first incarnation, *NBA Live 95* set the ball world on fire on its way to becoming the top-selling five-on-five basketball game of all time. But we're not resting on last year's props—we put our pointy little heads together to add even more phat features to *NBA Live 96*. We listened to NBA players, not surfers, and you, the loyal EA SPORTS™ customer. Here's hoping you like what you get:

- Exhibition, Season, and Playoff modes, with battery back-up and 1995-96 schedule.
- All 29 NBA teams (including the Vancouver and Toronto expansion teams), 2 All-Star teams, and 4 Custom teams.
- Real NBA players updated with complete 1994-1995 stats. (So put away that sports almanac; it's in the game.)
- New player and crowd animations, including tip-ins, spin moves, and power dunks.
- Improved strategy and options, including on-the-fly play-calling, animated play diagrams, full trades (trade any player, not just starters), expansion draft, shot summary diagrams, and roster management.
- Ability to create and modify custom players.
- New crowd free-throw interaction.

## Starting the Game

1. Turn OFF the power switch on your Sega™ Genesis™. **Never insert or remove a game cartridge when the power is on.**
2. Make sure a Controller is plugged into the port labeled Control 1 on the Genesis Console.
3. Insert the *NBA Live 96* cartridge into the slot on the Genesis. To lock the cartridge in place, press firmly.
4. Turn ON the power switch. EA SPORTS™ and *NBA Live 96* title screens appear (if you don't see them, begin again at step 1).
5. Press **START** after each screen to proceed to the Game Setup menu.

✓ **NOTE TO 4 WAY PLAY USERS:** Be sure to check 4 Way Play documentation for set up instructions.

## Setting Up the Game

- Always check the Help Bar at the bottom of the menu screen for quick instructions.

⦿ Press **START** to continue.

**EA TIP** These controls are used in all menus in *NBA Live 96*, so learn 'em here and use them everywhere.

### **MODE**

**EXHIBITION:** Play a single game with any NBA, All-Star, or Custom teams.

**SEASON:** Start a new Season where you control 1-4 NBA teams. (See "Season Play" on page 26.)

**PLAYOFFS:** Start a new Playoff tournament. (See "The NBA Playoffs" on page 31.)

**CONTINUE:** Continue a Season or Playoff saved in one of the two memory slots.

### **RULES**

**ARCADE:** Freeform basketball where the players never tire or get injured, and fouls and other violations aren't called by the refs.

**SIMULATION:** Absolute realism. Players tire, get injured, and foul out, and you must substitute accordingly.

**CUSTOM:** Use last SET RULES menu settings for rules and simulation options.

### **LEVEL**

**ROOKIE:** It's easy to score, and the computer team isn't too hard on you.

**STARTER:** Average difficulty; the computer plays harder on defense.

**ALL-STAR:** Showtime! It's difficult to make steals or block shots, and the computer offense and defense are cranked to the max.

**PLAYER STAR:** Toggle the identifier under a player's star between player **POSITION** or jersey **NUMBER**.

**SHOT CONTROL:** Toggle shot control between **MANUAL** and **AUTO**. In **MANUAL** mode, the chance the shot will go in is determined by the distance, angle, and release point of the shot. In **AUTO** mode, the shot's probability is determined by the NBA player's statistics and attributes rather than player control.

**ON-SCREEN HELP:** **TOGGLE** on-screen help messages **ON/OFF**. When **ON**, an overlay at the bottom of the screen lists the button options for the current menu screen.

## SET RULES MENU

**INJURIES:** Turn player injuries **ON/OFF**. When Injuries are **ON**, every time a player gets knocked down there is a slight chance he will be injured. In an Exhibition game, an injured player is only affected during the current game. In Season or Playoff mode, he is out for 1-7 games.

**FATIGUE:** Toggle player fatigue **ON/OFF**. When **ON**, players tire and you must substitute accordingly.

## TEAM SELECT SCREEN

The **TEAM SELECT** screen appears before every Exhibition game. The visiting team is displayed on the left side of the screen, and the home team appears on the right. Team ratings appear below the team names.

- ⦿ To toggle the highlight between the home and visitor teams, press **B**.
- ⦿ To change the highlighted team, D-Pad  $\leftarrow$  to cycle through the NBA, All-Star, and Custom teams.
- ⦿ To sort the teams by rating, D-Pad  $\uparrow$  to highlight a rating, D-Pad  $\leftarrow$  to cycle through the teams as sorted by that rating.
- ⦿ To view a report for the highlighted team, highlight **TEAM REPORT** and press **B**. The **TEAM REPORT** screen appears.

### Team Report options:

- To cycle through NBA teams, D-Pad  $\leftrightarrow$ .
- To change the home or visiting team to the currently selected team, press **START**. The computer asks you to confirm your choice. Highlight **NO** (cancel) or **YES** (confirm), then press any button to continue.
- Press **START** to return to the **TEAM SELECT** screen.
- ⦿ Press **START** to continue. The **PLAYER SET-UP** screen appears.

## CUSTOM TEAMS

In *NBA Live 96*, you get four Custom teams that you can populate with players from the rosters of 29 NBA teams or the Free Agents pool. Custom teams can only be used in Exhibition games, and have dashes around their names and ratings to differentiate them from NBA teams.

To play with a Custom team:

- ❁ Select any of the four Custom teams (SLAMMERS, BLOCKERS, JAMMERS, or STEALERS) from the TEAM SELECT screen. Press **START**, and the CUSTOM TEAM screen appears.

To change the players on the Custom roster:

1. D-Pad  $\uparrow$  to highlight the player you want to change, and press **B**. The bottom of the screen changes to list the starting players for an NBA team.
2. Press **A/C** to cycle through the NBA teams.
3. Highlight a player from an NBA team and press **B** to replace the original player with the highlighted player. You return to the roster of the Custom team.

✓ **NOTE:** The first time you select a Custom team, all the roster slots are empty. You must fill at least 9 roster slots before you can exit from the screen.

## PLAYER SETUP SCREEN

A Controller icon for each of the Controllers that can be plugged into the system appears on this screen. Up to four players may play if a 4 Way Play™ adapter and four Controllers are attached. In addition to selecting the team each player controls, you can create and select user names to personalize your Controller so your user stats can be tracked. Up to 10 user names can be stored.

D-Pad ↑ to select player names

D-Pad ← to select team

- ❁ To change the setting for your Controller, D-Pad ↓ to position the controller symbol under either team to select that team, or in the middle to select computer control.
- ❁ To cycle through player names, D-Pad ↑. Press **START** to select the highlighted name.
- ❁ When all players have selected their user names, press **START** to continue. The pregame introduction screens appear.

To delete an existing name:

- ❁ Highlight a user name, and press **A** + **C** to delete that name.

To enter a new player name:

1. Highlight **START NEW**, and press **START**. After all active players have pressed **START**, the **ENTER USER NAME** screen appears.
  2. D-Pad to highlight a letter, and then press **B** to select lower case or **C** to select upper case.
- ❁ To delete a letter, press **A**.
  - ❁ When you've entered the last letter, highlight **DONE**, and press **B** to enter the name. Press **START**, and the pregame introduction screens appear.

## PREGAME INTRODUCTION

Before the game, the pregame introduction screens set the stage for the basketball action to follow. First, the GAME INTRODUCTION screen announces the teams and home court.

- ⦿ Press **START** to continue. The TEAM MATCHUP screen appears.
- ⦿ The TEAM MATCHUP screen compares the two teams. One to five stars indicate strength in each of five categories (SCORING, REBOUNDS, BALL CONTROL, DEFENSE, and OVERALL). Press **START** to continue. The starting players from both teams are introduced.
- ⦿ Press **START** to go directly to the tip-off.

## The Tip-off

Every game starts with a tip-off between the centers.

- ⦿ To jump for the tip-off, press **C**.

## Playing the Game

You control the man over the star. Depending on which Controller you're using, the star has a different color:

Player 1	Red star
Player 2	Blue star
Player 3	Green star
Player 4	Yellow star
Computer	Gray star

If your player is offscreen, an arrow the same color as your control star points toward him from the edge of the screen. D-Pad in the opposite direction to bring him back onscreen.

Just like in the NBA, offense and defense require different skills in *NBA Live 96*. While the D-Pad is always used to move your player, the buttons have different functions on offense and defense. Learn the controls first, then you can focus on your basketball skills and strategy.

**EA TIP** When your player's star is pulsing, he's on a hot streak, and his attributes are temporarily boosted.

## OFFENSE

### Moving With and Without the Ball

-  Press the D-Pad in the direction that you want to move. You continue to move and dribble as long as you hold down the D-Pad. When you release the D-Pad, you stop moving, but maintain your dribble.
-  When you start to pass or shoot the ball, you stop dribbling. Once you stop dribbling, you cannot use the D-Pad to move again, or the refs call traveling.
-  To run faster, hold down **A** while moving. This kicks you into Turbo mode, where you may be able to catch another player from behind or make a lightning drive to the bucket.
 

**EA TIP** When **FATIGUE** is ON, Turbo mode wears out your players in a hurry, so use it sparingly.
-  To perform post-up moves, you must catch a pass when you are stationary in the low post area. When you press the D-Pad, the player swivels on his pivot foot rather than running and dribbling. To move normally again, press **A** + D-Pad.
-  If your player has a high enough Dribbling rating, you can execute a spin move by tapping **A** twice.

## Passing

- To pass to the closest receiver, press **B**.
- To retain control of the passer (perfect for give-and-go plays), hold **B** until the receiver catches the ball.
- To pass to a specific player, use the D-Pad to aim the pass while pressing **B**.
- To call for a pass when you don't have the ball, press **C**. If a computer-controlled player has the ball, he passes it to you. If your buddy has the ball, **C** has no effect.
- To throw an alley-oop pass, throw the ball to a player with a clear path to the basket. If he is in a position to jump for an alley-oop (and has the ability to make the play), an alley-oop is automatically executed.

**EA TIP** Since you can throw the ball faster than you can run, passing is the quickest way to move the ball on the court.

## Shooting

Players shoot differently depending on who and where they are. For instance, when shooting from the outside, the player will try a jumpshot. Closer in, and he may try a hook shot. Near the hoop, he'll try one of a variety of slams (assuming he can slam) or layups.

- To shoot, press and hold **C**. Release the ball at the top of your jump by releasing the button.
- To fake a shot, tap **C**.

**EA TIP** You'll shoot more accurately if you get your feet set before you shoot and release the ball at the top of your jump.

- ✓ **NOTE:** If the SHOT CONTROL setting in the SET OPTIONS menu is set to AUTO, simply press **C** to shoot — how long you hold the button doesn't affect the shot.

**EA TIP** If you press **B** before you release **C**, you can still pass the ball after you leave your feet to shoot.

## Rebounding and Tip-ins

When you don't have the ball, you can crash the boards. If your player has good position, he will automatically try to tip the ball back in the basket.

- ☛ To jump to grab a rebound or tip the ball in, press **C**.

## 24 Second Shot Clock

From the moment you gain possession of the ball, you have 24 seconds to get off a shot that hits the rim. Each time the ball hits the rim or a change of possession occurs, the clock is reset. The 24 second clock appears at the bottom left of the screen when there are 10 or fewer seconds left.

- ☛ If you don't get a shot off before the 24 second clock expires, the refs call a shot clock violation, and the other team gets possession.

## DEFENSE

Everyone wants to make the sports highlights with awesome dunks, but winning takes tough D.

### Switching Defenders

You can switch to the defender nearest the ball at any time, assuming he isn't controlled by another human player.

- ☛ To take control of the defender closest to the ball (between the ball and basket), press **B** (without pressing the D-Pad).

⚡ To take control of a specific defender, D-Pad in the direction of the defender and press **B**.

**EA TIP** Your first order on defense is to stop the ball, so get a man on the ballhandler before he reaches the top of the key.

## Steals

When you're close to the ball handler, your player automatically tries to reach in and steal the ball.

⚡ To try to steal the ball from an opponent, position yourself in front of the offensive player.

**EA TIP** You have to be close to the man with the ball to pull off a steal, but don't get too aggressive, or you may get whistled for a foul.

## Shot Blocking and Rebounding

Just as players shoot differently in different situations on offense, defensive players react differently when they jump on defense. If you jump near a player who's shooting, your player tries to block the shot. If you jump near a ball coming off the rim, your player tries to pull in the rebound.

⚡ To jump to reject a shot or work the glass, press **C**.

**EA TIP** Don't jump for the ball too quickly after a shot, or you may get called for goaltending.

## INFRACTIONS

When the refs spot an infraction on the court, they blow the whistle to stop play, and the violation is displayed onscreen.

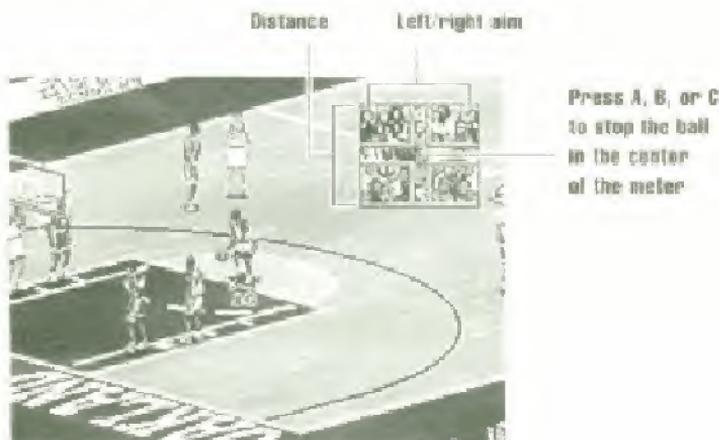

## Fouls

An offensive player gets to take free throws as follows:

- ▣ When a player is fouled after the defense commits 5 or more team fouls in a quarter, the offensive player gets 2 free throws. Offensive fouls don't count as team fouls.
- ▣ When a player is fouled in the act of shooting, he goes to the line. The basket counts if it is good, and the player gets one free throw. If the shot missed, the player gets two free throws (three if he was fouled while shooting a three-pointer).
- ▣ After a flagrant foul, the offense gets two free throws plus possession of the ball.
- ▣ When a player fouls out, press **START** to continue, and the computer automatically subs in a new player.

## Free Throws

Use the T-Meter™ to aim your shots from the line. The T-Meter appears when your player goes to the charity stripe.

The ball moves left/right on the horizontal bar to control the left/right accuracy of your shot.

- ☛ Press **A**, **B**, or **C** when the ball is in the center of the bar to aim your shot.

The ball moves up/down on the vertical bar to control the distance of your free throw.

- ☛ Press **A**, **B**, or **C** when the ball is in the center of the vertical bar to set the distance of your shot. The player shoots the ball, and normal play resumes.

The speed the basketball cursor travels on the bars of the T-Meter is controlled by the player's Free Throw rating — the better the rating, the slower the ball travels.

**EA TIP** When the visiting team shoots free throws, the home team players can rapidly press **A**, **B**, or **C** to animate the crowd background, making it harder for the shooter to concentrate on the T-Meter.

## PLAYCALLING

You can assign three different sets and/or specific plays or Quick Plays for both offense and defense from the STRATEGY menu, and then call them on the fly during the game. See "Strategy Menu" on page 22 for instructions on selecting sets and plays.

- ☛ To call the set/play assigned to **A**, **B**, or **C**, press and hold **START**, then press **A**, **B**, or **C** and release **START**. If your team has possession of the ball, an offensive play is called; on defense, a defensive play is called.
- ☛ Follow the steps from the animated diagram to execute the play. Computer-controlled players will move as outlined on the diagram, but you must control the actions of the ballhandler.

**EA TIP** The plays and sets are guidelines, but NBA players aren't robots—you make the play happen. We've drawn the X's and O's, but it's up to you to orchestrate your team.

## PAUSE MENU

The PAUSE menu appears whenever you press **START** during a game. You must pause the game to call a time-out, make a substitution, or choose from other menu options. The **TIME OUT** and **SUBSTITUTION** options are not always available—for instance, you can make a substitution only when the play clock is stopped. When options are dimmed, they cannot be selected.

## Instant Replay

When you need to see that soaring alley-oop one more time, you can replay the last few seconds of game action—backwards, forwards, reverse-angle, you got it.

- ❁ To go to the **REPLAY** screen while the game is paused, highlight **INSTANT REPLAY** from the **PAUSE** menu and press **B**. An overlay displaying the game clock and the button functions appears at the bottom of the screen.

Name of player camera is 'locked' on

Tap **←** to move frame by frame

Hold **C** to fast forward/rewind

Press **C** to play forward

Press **A** for reverse play

- ⦿ To move the replay camera to lock onto a player or the ball, hold **B** and D-Pad in any direction. A cross appears over a player when the camera is locked on him.
- ⦿ To toggle between normal and reverse angle, press **A + B**.

## Time Outs

You can pause the game at any time, but you must have possession of the ball to call a time out. The number of time outs remaining is listed after **TIME OUT** in the **PAUSE** menu. Each team gets 7 time outs per game. (If you call a time out after your 7 are exhausted, a technical foul is called and the other team shoots a free throw — but the clock is stopped.)

To call a time out:

- ⦿ Highlight **TIME OUT** from the **PAUSE** menu and press **B**. The **SUBSTITUTION** option becomes available if it was not already.

## Substitution

You can make player substitutions when the play clock is stopped between periods, by a time out, or by a violation such as a foul or out of bounds. When the clock is not stopped, the **SUBSTITUTION** option isn't available.

To make a substitution:

1. When the clock is stopped, select **SUBSTITUTION** from the **PAUSE** menu. The Substitution screen appears. The 5 players currently in the game are listed on the screen.
  - ⦿ To cycle between game stats, attributes, 1994-95 stats, and quarter stats, press **MC**.
  - ⦿ To cycle through the available stats/ratings for the players, D-Pad **←**.
2. To highlight a player for substitution, D-Pad **↓**.
3. To substitute for the highlighted player, press **B**. A screen listing the available bench players appears.

4. D-Pad  $\uparrow$  to highlight a player, and press **B** to insert that player into the lineup. To return to the Pause menu, press **START**.

**EA TIP** Track the **STAMINA** rating for your players throughout the game — when a player's bar turns orange or red, sub for him as soon as possible.

## Statistics Menu

View stats for the current game or, if available, the current series.

**PLAYER STATS:** Go to **PLAYER STATS** screen to view statistics for NBA players. The team you control is shown by default.

☛ To switch to the other team, press **B**.

☛ To cycle through the available stats and player ratings, press **A/C**.

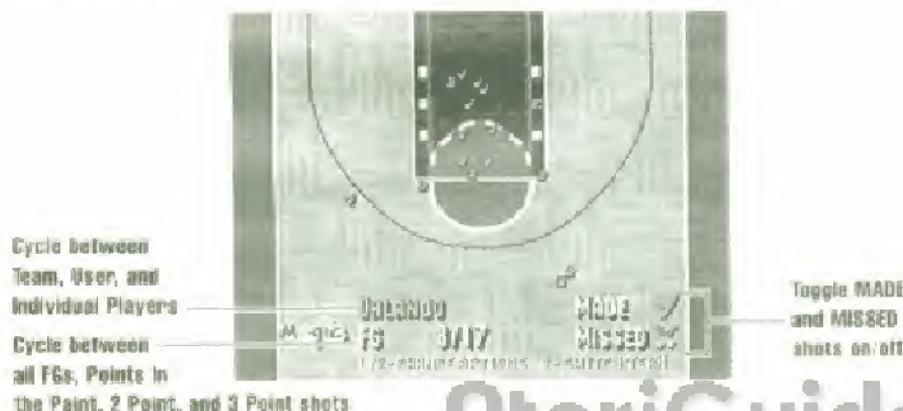

**TEAM STATS:** Go to **TEAM STATS** screen to view both teams' statistics for the current game.

**USER STATS:** Go to **USER STATS** screen to view stats (sorted by Controller) for all human players participating in the current game.

**TEAM AND LEAGUE LEADERS:** (Series mode only.) View team and individual player statistical leaders.

## Shot Display

View a shot chart showing made (✓) and missed (✗) shots.

- ⊗ To highlight an option, D-Pad ↑
- ⊗ To cycle the highlighted option, D-Pad ←
- ⊗ To switch to the other team, press B.

## Strategy Menu

### Offensive Plays

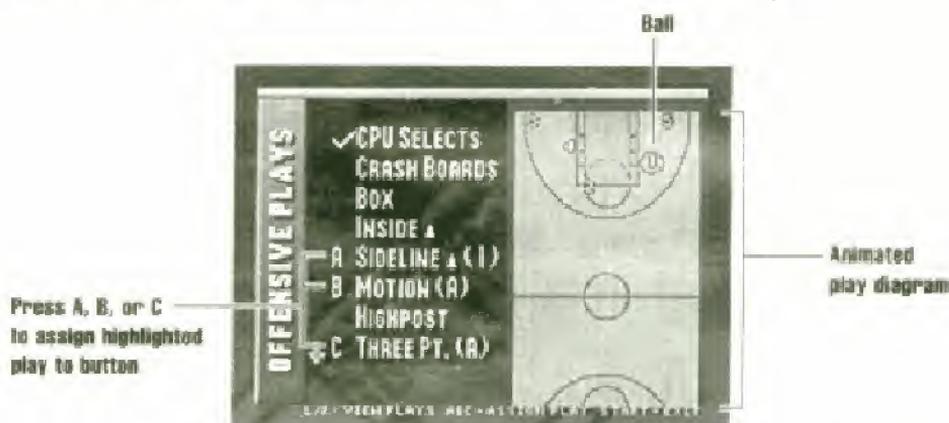

Go to OFFENSIVE PLAYS menu to select offensive sets, plays and strategy. You can have the computer automatically choose sets and plays, or you can choose three sets/plays to call during the action.

**CPU SELECTS:** Toggle auto playcalling **ON** ✓ (OFF (no check)). When ON, the computer chooses offensive sets and plays automatically (but you can still call your own plays when you want). When set to OFF, you call all your plays manually, and any play or set you call is run until you call another.

- ⊗ To toggle an option ON ✓ / OFF highlight the option and D-Pad ←.

**CRASH BOARDS:** Go after offensive rebounds aggressively if ON, and get back on defense if OFF.

**OFFENSIVE SETS AND PLAYS:** Seven offensive sets are available in *NBA Live 96*, and each set contains from 3-5 plays.

- ⦿ To highlight an offensive set, D-Pad ↓.
- ⦿ To cycle through the plays for the highlighted set, D-Pad ←.

As you select plays, the animated diagram on the right displays the motion of the players and the ball. In the diagram:

- |                  |                        |
|------------------|------------------------|
| 1. Point Guard   | 2. Shooting Guard      |
| 3. Small Forward | 4. Power Forward       |
| 5. Center        | Ⓢ Player with the ball |

The first play in each set has an "A" for Automatic after it. When an Automatic play is selected, the computer randomly chooses a play from that offensive set, and then keeps calling plays from that set until another set or play is called. If you select a specific play (i.e., any play other than "A"), that play is run until another is called.

- ⦿ To select the highlighted set/play and assign it to a button, press **A**, **B**, or **C**. The selected play is assigned to that button, and any other play assigned to that button is cleared.
- ⦿ To call the appropriate play during the game, press **START** + **A**, **B**, or **C**.

✓ **NOTE:** If you're using a 6 button controller, you can use the **X**, **Y**, and **Z** buttons to assign and call plays rather than **START** + **A**, **B**, or **C**.

## Defensive Sets

Go to DEFENSIVE SETS screen to select defensive sets and options.

**CPU SELECTS:** When set to **ON** (✓) the computer selects defensive sets automatically. When set to **OFF**, any defensive set you call is maintained until you call a different set.

**PRESSURE:** Select **L** (low), **M** (med.), or **H** (high) defensive pressure. Higher pressure may lead to more steals, but also more fouls.

**DEFENSIVE SETS:** Five defensive sets are available, including man-to-man and trapping sets. The clipboard diagram on the right side of the screen shows the alignment for the highlighted set. Sets are selected and called in the same manner as offensive sets, except that there are no individual plays-only basic sets.

## Off. Quick Plays

In the NBA, a basic play such as a pick and roll between a point guard and a power forward can be the cornerstone of a team's offensive success. In *NBA Live 96*, you can call your own NBA-style Quick Plays on the fly. Quick Plays differ from standard plays in that they are quick, simple, and can be run from any set (but do not alter the set).

Quick Plays are selected in the same manner as plays, and any button assigned to a Quick Play overwrites any other offensive set or play assigned to that button. The diagrams show a typical situation in which the Quick Play can be called. However, the plays will execute differently depending on which player calls the play and where the player is located on the court. Experiment for best results.

- ☛ To call the appropriate Quick Play during the game, press **START + A, B, or C**.

## Def. Quick Plays

Two Defensive Quick Plays are included so you can stop the clock with a foul or double-team the ballhandler without altering your basic defensive set.

**INTENTIONAL FOUL:** Computer players try to foul the ballhandler to stop the clock.

**DOUBLE TEAM:** Computer players try to double-team the ballhandler.

- To call the appropriate Quick Play during the game, press **START + A, B,** or **C.**

## Defensive Matchups

Go to Defensive Matchups screen.

1. To select the highlighted player, press **B.**
  2. To change the opposing player the selected player guards, D-Pad  $\uparrow$  to highlight the player you want to guard, and press **B** again. The player who was guarding the man you selected now guards your original man.
- To toggle double-teaming **Y/N** for the highlighted player, D-Pad  $\leftarrow$ . When set to **Y**, the computer-controlled defensive players try to double-team the player when he has the ball.
